

Fazle Rabbi

I'm a passionate MERN stack developer from Bangladesh . My love for coding is fueled by a diverse range of tech interests, including web, mobile, and desktop app development, along with a keen eye for cybersecurity and ethical hacking. Specializing in web development, I'm committed to becoming a modern full-stack developer.

PROJECT

Rainbownote

Dec 23

- A vibrant MERN note app with GitHub login, trash management, and public note sharing. Personalize notes with covers, icons, and enjoy the sleek TinyMCE editor. Powered by Vite React, Appwrite, React-Hook-Form, React-Query, and Tailwind CSS.

Tech-Canvas

Sept 23

- Designed and developed a sophisticated blog platform powered by Next.js, dedicated to exploring cutting-edge tech trends, tutorials, and insightful content. Implemented SEO optimization techniques to enhance online visibility and prioritized user-friendly features for an optimal browsing experience. This project underscores my commitment to creating impactful and accessible web solutions.

iChat

Sept 23

- Realtime chat app built with Next.js and Firebase, revolutionizing instant messaging with speed and precision!

Codeswear

March 23

- Codes-Wear is a free and open source e-commerce website built with Next.js. You can use this project as a template for your own e-commerce website.
